

HADSON MUMO

Full-Stack Developer & AI Training Specialist | Nairobi, Kenya

hadsonbrookes@gmail.com | WhatsApp +254 741 032 236 | github.com/HKTechhh

PROFESSIONAL SUMMARY

Full-stack software developer with extensive experience in frontend technologies such as React, Next.js, and TypeScript and backend technologies such as Python/Django and PHP/Laravel, with a strong passion for LLM API integration and browser automation tooling. Good at comparing models' responses to structured rubrics and expressing clear and defensible technical reasoning. Possesses excellent analytical decision-making, technical writing, and practical experience with AI training processes on various platforms. Seeking projects in code evaluation, technical reasoning and review of software / CS domain responses.

EDUCATION & CREDENTIALS

Bachelor of Science in Computer Science

2016 – 2020

Maseno University

Full-Stack Development & LLM Integration Proficiency — Self-directed, ongoing

Founder, HKTechhh Solutions — Digital products and services: web/app development and SaaS builds

PROFESSIONAL EXPERIENCE

AI Training & LLM Evaluation (Freelance)

2024 – 2026

Remote

- Wrote structured justifications for judgements on the accuracy, relevance, clarity, safety, and technical correctness of responses to LLMs, and evaluated them according to detailed rubrics.
- Carried out comparison and ranking activities, making choices for better quality products using clear justification supported by evidence.
- Fully implemented platform-specific screening tasks using Python and JavaScript and applied complex screening guidelines and evaluated the quality of code.
- Filled in evidence in rubric assessment tasks with consistency and accuracy.

Full-Stack Software Developer (Freelance)

2022 – Present

Remote

- Designed and developed full-stack applications using either React/Next.js for the front end and Python/Django or PHP/Laravel for the back end or vice versa, with considerations for performance and maintenance trade-offs.
- Developed and implemented integrated LLM APIs (Anthropic, OpenRouter, Groq) in production systems, including prompt engineering, response parsing and evaluation logic.
- Automated browser testing and end-to-end QA using Playwright; created deterministic test cases and documented failures with root cause analysis.
- Created automation tooling and reviewed pull requests to ensure logic correctness, adherence to coding standards and meeting the architecture.

Academic Freelance Writer & Content Professional (Edusson and Essaypro)

2023 – Present

Remote

- Produced well-structured, original academic writing across diverse disciplines — computer science, finance, statistics, and technology — using APA/MLA formatting.
- Designed and crafted professional PowerPoint presentations to communicate technical and analytical content effectively.
- Synthesized complex information, applied critical reasoning, and presented structured arguments under rubric-based evaluation criteria.
- Built a track record of consistency and attention to detail across hundreds of submissions with high client satisfaction.

CORE SKILLS

AI Training: LLM Evaluation • Response Evaluation • Rubric-Based Scoring • Code Evaluation • Code Review • Technical Reasoning • Ranking & Comparison • Guideline Compliance • Quality Assurance

Development: React • Next.js • TypeScript • Python • Django • Laravel • LLM API Integration • Prompt Engineering • Browser Automation (Playwright) • Automated Testing • Technical Writing

Presentation & Productivity Tools: PowerPoint Presentations • Academic Formatting (APA/MLA) • Rubric Evaluation
